Professional Summary

Veteran and Software Engineer passionate about building tools that empower communities. Experienced in developing full-stack web applications using Python, Java, Django, React, Docker, and Vite. Proven track record in leading tech rollouts, delivering customer success in SaaS environments, and applying military-grade discipline to real-world software challenges.

Technical Skills

Languages: Python, Java, JavaScript (ES6+), SQL, HTML5, CSS, C, C++
Front-End: React, DOM manipulation, WebSockets, jQuery, Angular, Vue
Back-End: Django 4, Node.js, Express, PostgreSQL, MongoDB
DevOps: Docker, CI/CD, Git, Vite
Design: Microservices, Monoliths, Domain-Driven Design, Event Sourcing, Containerization

Projects

Never Left Behind | Full-Stack Engineer
https://never-left-behind-veterans-r-us-f6bdcd9fc60e57def2a9122364944c2.gitlab.io/
- Built a veteran outreach platform increasing engagement by 30%
- Used React + Vite for the front end; implemented account creation, event sharing, and API integration
- Early prototypes involved Angular, Vue, and jQuery for testing multiple frontend stacks

CarCar | CRM Platform Developer
https://gitlab.com/Tynyx/project-beta
- Created a React + Docker-based CRM for car dealerships
- Integrated appointment scheduling, technician workflows, and VIP flagging
- Enabled seamless inventory tracking and customer management

TheOfficeApp | Java OOP Simulation
https://github.com/Tynyx/TheOfficeApp
- A humorous Java-based simulation modeling salespeople, a warehouse, and office manager logic
- Demonstrates core object-oriented principles like class structure, method interaction, and data updates

Professional Experience

Brooksource @ AdventHealth – EPIC TDR Field Tech Team Lead
Nov 2021 – Oct 2023
- Led deployment of 23,000+ devices with a 98% success rate
- Managed 2 field teams across multiple hospital sites
- Used ServiceNow to track repairs, improving efficiency by 50%

Kaseya LLC – SaaS Support Engineer
Jun 2023 – Oct 2023
- Resolved 30% of recurring platform issues
- Partnered with L2/L3 teams to improve UX and boost customer satisfaction by 20%

Superior Small Business Consultants – IT Technician
Jan 2018 – Jan 2022
- Managed office tech uptime (65% improvement)
- Proposed call-routing system that raised client acquisition by 35%

Military Experience

U.S. Army | 19 Kilo, E-4
Active: Jul 2012 – Nov 2015 | Reserves: Until 2019
- Developed leadership, communication, and adaptability in high-pressure environments
- Proficient with both classified/unclassified systems and prioritizing mission-critical tasks

Education & Certifications

B.A.S. in Computing Technology & Software Development – Valencia College (Expected Aug 2026)
Advanced Software Engineering Certificate – Hack Reactor (Feb 2024)
A.S. in Computer Information Technology – Valencia College (Mar 2022)
Certifications: Operations Support and Services, Computer Information Data Specialist
